

Price Utah
May 11 1954.

Mr. Joseph M. Tracy,
State Engineer
Salt Lake City

Dear Mr. Tracy:

RE: PRICE RIVER DISTRIBUTION
Application No. a-1366

This two and one third C. F. S. water in question has be in the Wellington Canal since 1950 that I know of and the water users say for longer than that.

Mr. Geo. Miliner's land is across the Price River from the Wellington Canal and for a very short time in 1952 he may have siphoned this water to his land.

The Snyder Ditch is on the same side of the river as Mr. Miliner's land and is now full of water and there is a good fifteen C. F. S. going by his land. (down the river)

I have been carryng this water in Wellington Canal and will continue to do so until notified otherwise

Sincerely yours,

Harvey Thomas
